

## Wheels, Tracks & Rollers Courses

**General Course Info:** Course content is as follows:

- Describe special type vehicles and the appropriate health and safety requirements
- Describe legal requirements for special type vehicles
- Inspect special type vehicles for maintenance
- Prepare special type vehicles for use
- Manoeuvre special type vehicle
- Stop, shut down and park special type vehicle

**Pre requisites:**

Appropriate Class of license in relation to the special type vehicle for which the endorsement is required.

Please note that the license endorsement and license class systems work together. If you are to operate special type vehicles (Plant/Equipment) on a road then your license has to cover both the vehicle **type** (endorsement R, T and/or W as applicable), and the vehicles **weight** (Class of license). For example, if the special type vehicle you wish to operate is a tracked excavator (digger) with a gross laden weight of 18,000 kg, you will need a Class 2 drivers license (weight factor), and a T endorsement (special vehicle type – tracked vehicle) on your license.

**Duration:** 2-3 hours

**Bring With You:** Suitable steel capped work boots

**Prices:** From time to time prices change, therefore prices will be advised on request.

If you have any further inquires, please contact us at the office on 0508 267 637.
